Date : September 19, 2016

My indoor cat has somehow gone missing! We let her outside sometimes but there's always someone outside with her when we do let her out but no one in my house can seem to find her. 😭 When she does accidentally slip outside, she stays outside by our door and meows until she's let back in. I'm hoping she didn't accidentally slip outside or anything. Does anyone know what to do

in the case of a missing indoor kitty?? Maybe what places she could be hiding in the house? My family has looked everywhere. If it's the case that she's gotten out, we don't have a collar for her but her picture is below and feel free to send me a message if you so happen to see a little kitty around the area!

She's a little over a year old. Her name is Nala. She's very anxious to loud noises. ??
