In an attempt to catch my cat (Nugget, who is now home!) this guy ended up in my trap. Looks like they might still be a kitten, unable to tell if m/f. Since there are already ferals around I want to get them checked for a chip/TNR tomorrow if TARA can fit me in. It seems feral but so does my cat when he's outside lol. Pretty sure I've seen it around before but since it's trapped I want

to do something about it. Let me know if I have your kitty!
