Three years ago we rescued a young ferral cat seen roaming in the neighborhood. We thought she was a kitten, but the vet confirmed that she was a malnourished young cat. She is about 5/8 size of an adult cat and stays in my office with me where she feels most comfortable. She's learned the comfort of indoor living and the pleasure of having people around.

Thursday evening she slipped out the door. We're very upset and hope to find her. Please let us know if you catch sight of her and we'll come immediately. Thank you!
