A month ago, this sweet female cat appeared in our driveway in Valley Cottage and was meowing loudly. She has a belly and we are concerned that she might be pregnant. We have been feeding her on our front porch every day and she sleeps there safely. I can pet her but can't catch her yet to bring her to the Vet and check for microchip. If she belongs to someone, we can

arrange for them to come to our house, otherwise we will gladly keep her. Your help is much appreciated!
