Hazel is a gray and white long haired, outdoor cat who has gone missing. She knows how to get home, so I believe she is stuck in a garage or someone has taken her in. She weighs only 7 lbs so she looks quite skinny with her coat shaved down right now. She has a cat door and comes home at least 5 times per day, she also sleeps at home every night and I close the cat door each

night to keep her safe. She is very loved and we miss her terribly. Thank you for any help you can provide.
