My tabby rescue that I've had for about 3 years followed my other cat out a cracked window that had a hole in the screen. When we realized we opened the side door and our younger more outgoing and daring cat ran back inside but Ollie darted the other way toward the back of the house where there is a huge abandoned barn. He's been gone since the early morning of the night

before last. So it's been 37 hours. He is an indoor only cat with a grey Seresto flea collar. We moved to this area, he was found and rescued by my old apartments on mettacahonts rd in Accord. We are now in Wawarsing on Lundy road. Please help I am scared and just want my cat home. This cat is afraid of his own shadow.
