Rainy ran off about 3:30 this afternoon. She is dragging her leash and I am afraid it has caught on something and she isn't able to return. I've been searching on foot and in the car and with other dogs that are her friends in case they can hear her and I can't. Please if you live in the area could you listen for her? It's so cold tonight and I don't think I can look any farther

tonight. I appreciate any help from my neighbors. Thank you!
