I'm afraid this boy has been missing for a while now. I just found out about this resource, and thought it might be worth a try. He is an indoor/outdoor farm cat that I adopted and took with me when I moved. He was miserable for the 6 weeks I kept him indoors, and when he got out I just didn't see him again. He has been missing since late September. He is blind in his right eye

due to a virus he had as a kitten.
