If it's possible please help. Our Houdini opened our back screen just enough and got out sometime from last night to this morning.

His name is Luci(fur) he is a tabby with a black collar white skulls (bell and name plate)-my # also on. With his tabby marking to has "O"s on his sides.

He's one that gazes at the outside world. I am certain he will be skittish with anyone but food driven.

Highland (Town of lloyd)- We live off Brecia, Toc drive is my backyard.
