Possibly German pointer. She found me at my home on Hardenburgh Road in Pine Bush, NY. It was obvious she recently had puppies and is still feeding, I did not take her in she she can still go back to her babies if she can find them. She was friendly and looking for help and attention, but would not lead me anywhere but zig zags around my yard, did not want water and only took two pieces of food from my hand and did not care for the rest. I did not hear any

puppies nearby where we were. It was hard to get photos as she was moving a lot and very close to me or sniffing around frantically.
