Location: Waring Rd near Algonquin park

Date : July 8, 2024

Mama Kitty broke out thru a window. She is chipped. Spayed, utd with vaccines. She was trapped last year when she gave birth in my barn. She was very feral. Once I brought her inside she was super domesticated heard and sweet. Now that she's out she's acting feral again and difficult to trap. I am leaving water and food out however I haven't had a visual on her in about 5 days. There is a male gray tiger stripe with a white face that seems to be her

buddy. Neighbors have not seen either one of them and they may be traveling together.
