Nibby is a semi-feral cat who has been in my care along with his mom and sister. He had just been neutered and released back to me. He stuck around for 3 days but I have not seen him in almost 2 weeks. I know they tend to roam even after being neutered so I am just hoping that somebody has seen him and I at least know he's out there. Roaming I know at some point in time he will come back. I am just praying that nothing has happened to him
